Wide Distribution Network

Directly From
Our Own Quarries.

High Quarrying Capacity

Using lots of modern machineries, many quarry sites and years of experience, we are able to supply any order especially large scale and long term orders.

Quality Warrantied

Having many experienced experts and engineers and using standard methods, we have a reliable grading system for stone blocks so that there is no need to come at quarry sites to choose a block, also there is always a quality warranty.

Ocean Blue Onyx

AMBER ONYX

Amber Onyx with its beautiful color and translucent nature is quarried in south east of Iran. Unlike its rivals, amber onyx color will not fade in sunlight.

مرمر طلایی، به دلیل رنگ گرم و قابلیت بسیار بالای عبور نور از پرطرفدارترین سنگ های مرمر موجود در بازار است. از ویژگی های منحصر بفرد این مرمر، عدم تغییر رنگ در زیر نور آفتاب می باشد. معدن این سنگ در جنوب شرقی ایران واقع شده است.

SMERALDO ONYX

Cross Cut

True to its name, Smeraldo onyx is one of the most beautiful semi-precious natural stones with unique green texture, coming from south east of Iran and can be processed in both cross cut and vein cut.

مرمر سبز اسمیرالدا، که نام آن برگرفته از سنگ زمرد به زبان ایتالیایی می باشد، یکی از خاص ترین مرمرهای موجود در بازار است و معدن آن در جنوب شرق ایران واقع شده است. این سنگ به دو صورت بی موج و موجدار فراوری و عرضه می گردد.

Vein Cut

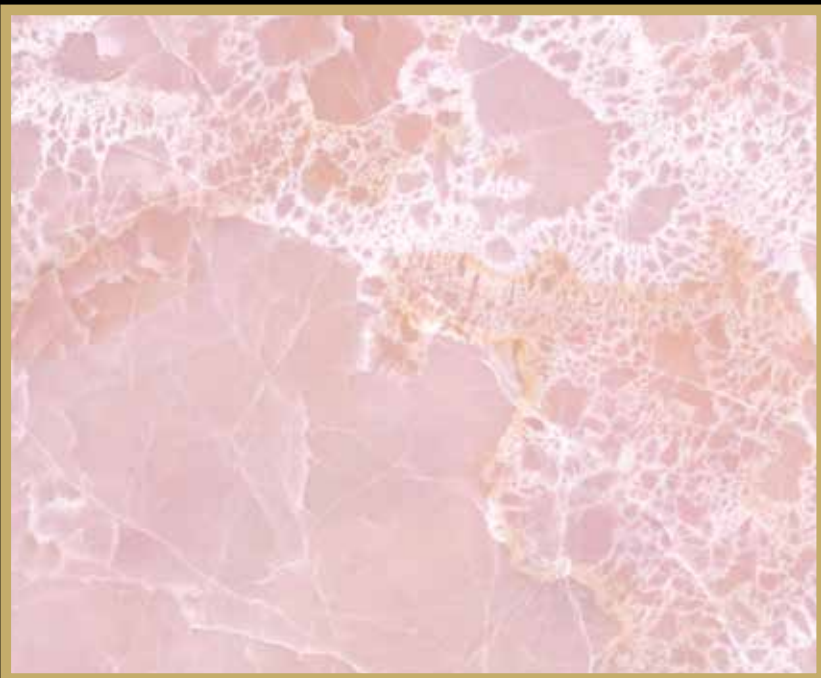

PINK ONYX

Pink onyx is one of the rarest and most well-known natural stones which is quarried in north west of Iran. With its refined black vein, pink onyx is a harmonious blend of both classic and contemporary look.

مرمر صورتی، یکی از نادرترین و شناخته شده ترین سنگ های طبیعی می باشد و معدن آن در شمال غرب ایران واقع شده است. این سنگ به دلیل ترکیب رنگ صورتی با خط های طوسی برای طراحی کلاسیک و مدرن مناسب است.

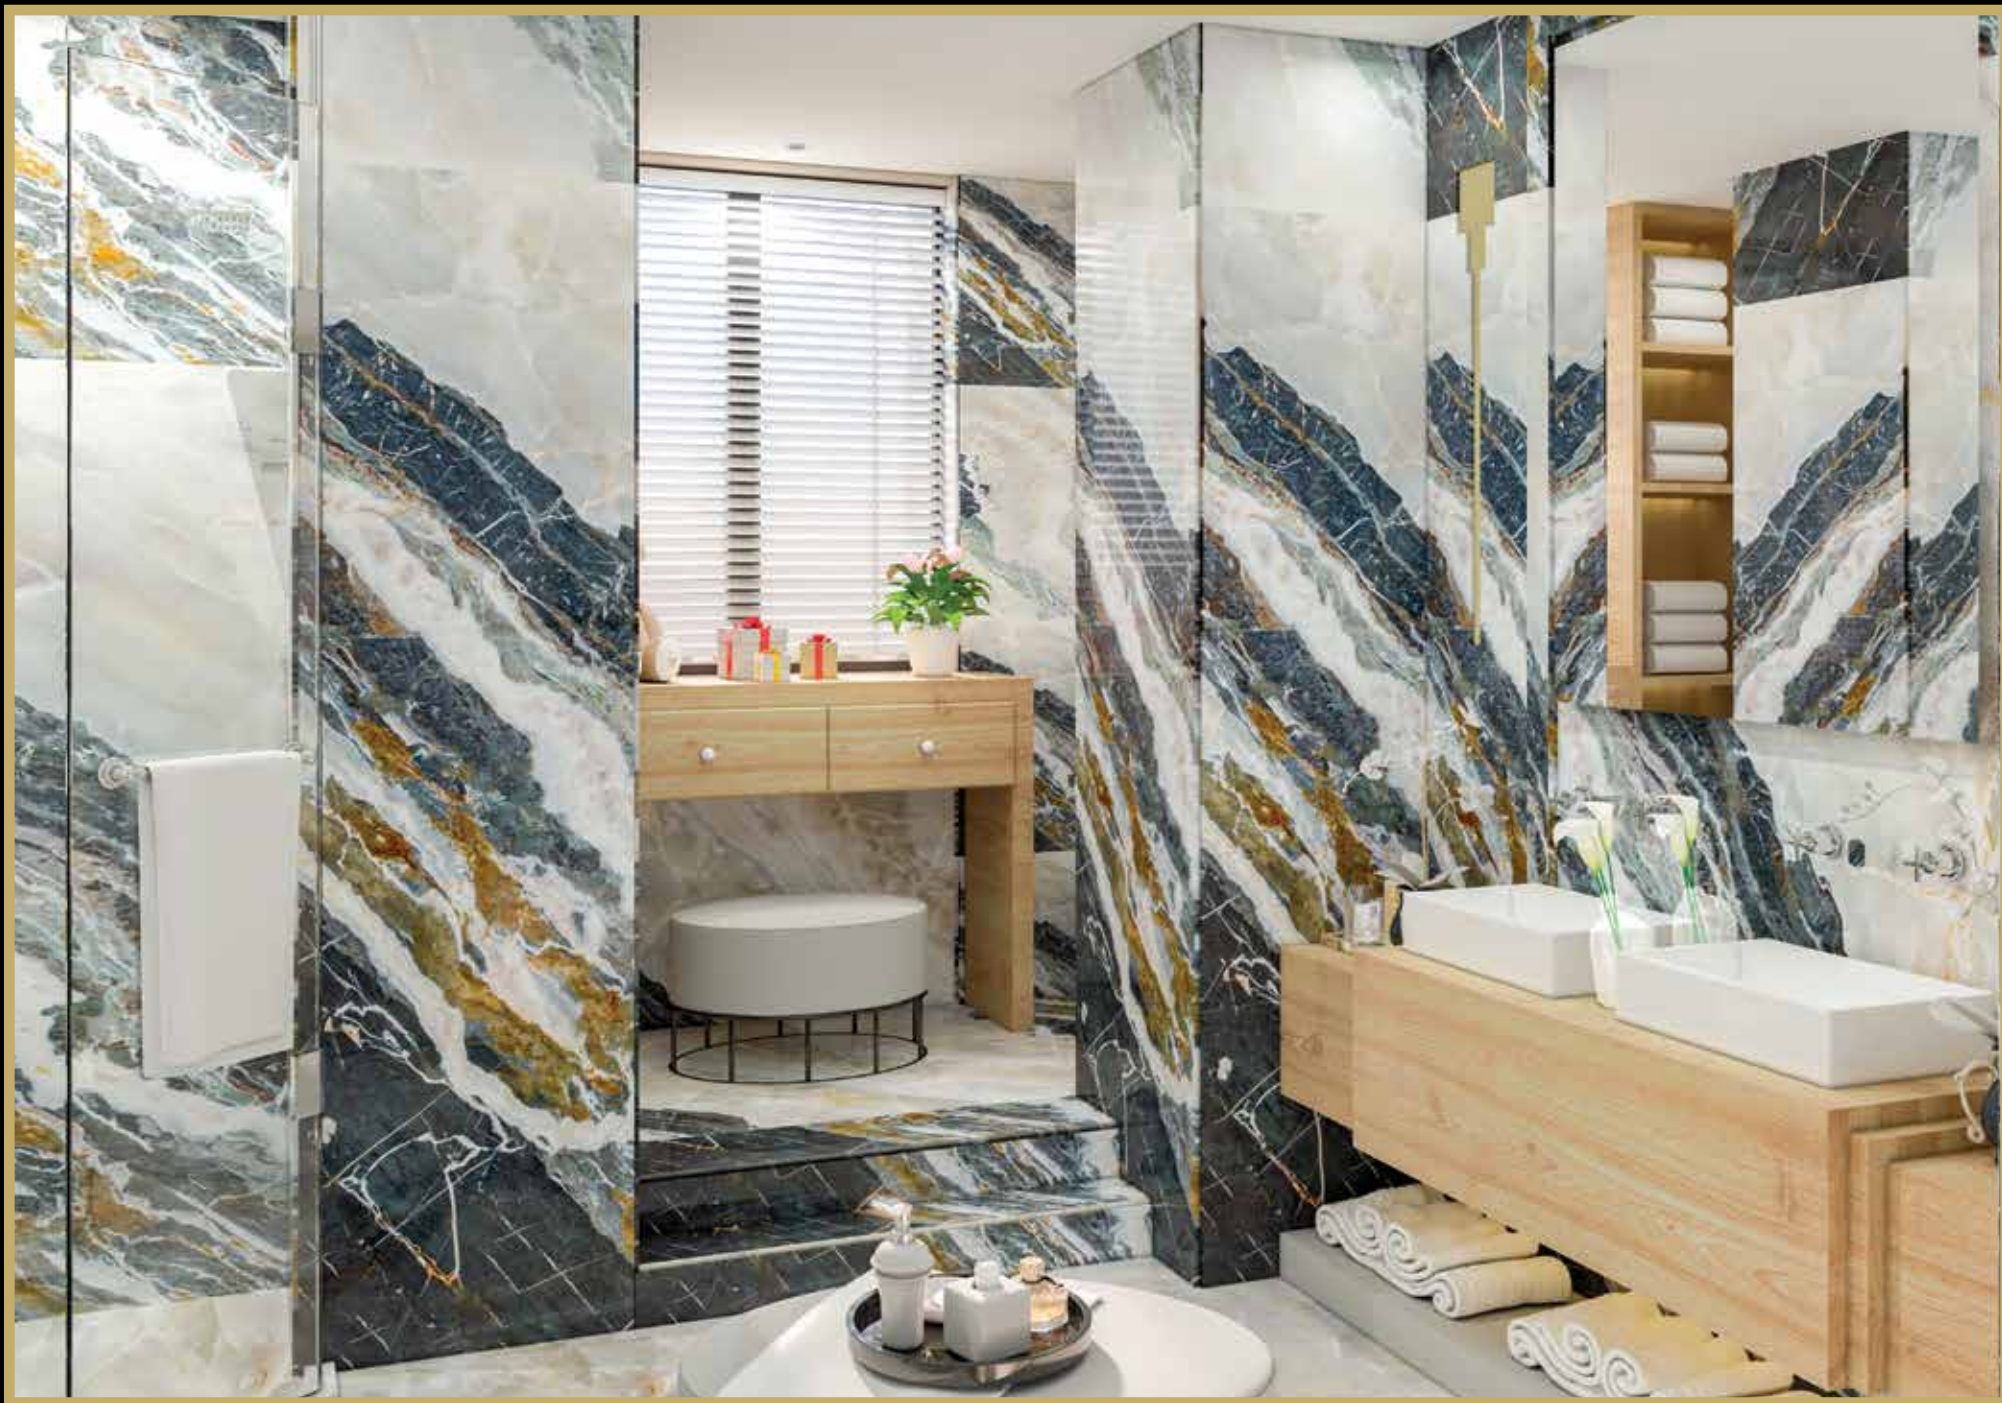

GALAXY ONYX

Black and white combination always gives a perfect look to any design, especially when it is accompanied by translucent effect. Galaxy onyx has been recently introduced to the market and is quarried in 250 km of Tehran, the capital of Iran.

مرمر گالکسی، با توجه به ترکیب سیاه و سفید و قابلیت عبور نور، در بسیاری از پروژه‌های مدرن استفاده می‌گردد. این سنگ به تازگی به بازار عرضه شده و معدن آن در ۲۵۰ کیلومتری استان تهران واقع شده است.

Cross Cut

Vein Cut

EMERALD ONYX

As glowing as Emerald, this onyx can be the jewel of any design. Emerald onyx is quarried in south east of Iran and can be processed in both vein cut and cross cut.

مرمر سبز امرالد، سنگی بسیار زیبا برای استفاده در طراحی داخلی پروژه‌ها می‌باشد. معدن این سنگ در جنوب شرق ایران واقع شده و به دو صورت بی‌موج و موجدار فراوری و عرضه می‌گردد.

The background is a light green and blue marbled pattern. On the left, there is a dark, textured rectangular area with a diamond-shaped grid pattern. Overlaid on this and the background are several white geometric shapes: a row of five right-pointing triangles at the top, a row of four right-pointing triangles at the bottom, and four large right-pointing triangles of varying sizes. A faint, stylized illustration of a modern building with multiple levels is visible in the center-right background.
